

Composite elements comprising polyisocyanate polyaddition products

5 Abstract

Composite elements have the following layer structure:

- (i) from 2 to 20 mm of metal,
- 10 (ii) from 10 to 300 mm of polyisocyanate polyaddition products obtainable by reacting (a) isocyanates with (b) compounds which are reactive toward isocyanates in the presence of from 1 to 50% by volume, based on the volume of the polyisocyanate polyaddition products, of at least one gas
- 15 (c) and also, if desired, (d) catalysts and/or (f) auxiliaries and/or additives,
- (iii) from 2 to 20 mm of metal.
